

Occupational Earnings and Wage Trends in Metropolitan Areas, 1990

U.S. Department of Labor
Bureau of Labor Statistics
April 1991

Summary 91-3 (No. 3 of 3)

The Bureau of Labor Statistics surveys metropolitan areas throughout the year in its occupational wage surveys program covering 90 areas. Approximately 60 areas are surveyed each year; of these areas, 32 are surveyed annually and 29 biennially (alternating with the remaining 29 areas in the program).

The tables in this summary present data for 20 areas surveyed from September to December 1990. Data for the remaining areas surveyed in 1990 were presented in two earlier summaries.

The program covers six industry divisions: Manufacturing; transportation, communications, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and selected services. Major exclusions are the mining and construction industries, health and education services, government, and establishments employing fewer than 50 workers.

Earnings information is presented in this summary for selected office; professional and technical; and maintenance, toolroom, powerplant, material movement, and custodial occupations common to a variety of industries (tables 1-3). Classification of workers by occupation is based on a uniform set of job descriptions designed to take account of variation among establishments in duties for the same job. (Job descriptions are available on request.) Data are not shown if employment in the occupation is

insufficient to merit presentation or if there is a possibility that data for an individual establishment may be disclosed. Wage trends computed for selected occupational groups are also presented (table 4).

Individual area bulletins are published upon completion of each survey. Data on average straight-time earnings and distribution of workers by earnings intervals are presented for selected occupations and industry groupings. The area bulletins also present information on minimum entrance salaries for inexperienced office workers; shift differentials; scheduled weekly hours and days of work; paid holidays; paid vacations; insurance, health, and retirement plans; health plan participation; and other selected benefits. This information on establishment practices and employee benefits is collected every fourth year.

In addition to the area wage survey program, the Bureau conducted approximately 80 wage surveys in 1990 at the request of the Employment Standards Administration of the U.S. Department of Labor for use in administering the Service Contract Act. Although generally similar to the regular area wage surveys, these special surveys are more restricted in the number of benefits studied and the amount of detail published for industry groupings; moreover, they present no wage trend data.

¹ The industries within the scope of the survey are: Manufacturing; transportation, communications, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and selected services. Weekly earnings exclude premium pay for overtime and work on weekends, holidays, and late shifts. Nonproduction bonuses and other lump-sum payments are also excluded.

² Data are included in the overall category of multilevel occupations even when a level is not shown or information to subclassify is not available. In some cases, the overall category may not meet publication criteria even though individual levels are published.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

¹ The industries within the scope of the survey are: Manufacturing; transportation, communications, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and selected services. Weekly earnings exclude premium pay for overtime and work on weekends, holidays, and late shifts. Nonproduction bonuses and other lump-sum payments are also excluded.

² Data are included in the overall category of multilevel occupations even when a level is not shown or information to subclassify is not available. In some cases, the overall category may not meet publication criteria even though individual levels are published.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

¹ Hourly earnings excluding premium pay for overtime and work on weekends, holidays, and late shifts. Nonproduction bonuses and other lump-sum payments are also excluded. For method of computing, see bulletin for any area.

² Percent increases have been adjusted to reflect a 12-month period even though the time span between surveys may have been other than 12 months.

³ Transportation, communications, and other public utilities; wholesale trade; retail trade;

finance, insurance, and real estate; and selected services. Skilled maintenance workers in nonmanufacturing are not presented because most of the workers in this job group are in manufacturing industries.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

Area Wage Surveys Available Individually and by Subscription

Area wage survey publications may be ordered individually by checking the appropriate boxes on this page and completing the order form below. A subscription, at \$73.00, will bring you all the surveys published during the following 12 months. The 32 largest areas are surveyed every year, and two groups of 29 areas are surveyed in alternate years.
